

Plant 1: OAK TREE

HINTS:

- it is a very large tree
- it has leaves that change colour to yellow or red
- their fruits are called acorns

Plant 2: CHESTNUT

HINTS:

- it is a very big tree which gives us a lot of shade in the summer
- the fruit of this tree is a nut, covered with a spiked shell
- we love to eat this fruit in autumn – you can buy it on the street, served in a paper bag

Plant 3: MUSHROOM

HINTS:

- they look like little umbrellas that grow on the forest floor
- some can be very healthy but some are poisonous so you have to be careful which one you pick
- they are made up of 90% water

Plant 4: FERN

HINTS:

- they are one of the oldest plants in the world
- they grow around the world – in forests, tropics, even in the Arctic!
- they make lovely houseplants
- they do not have seeds or flowers

Plant 5: PINE TREE

HINTS:

- these trees can grow up to 80 meters tall
- their »leaves« are shaped like needles and they remain on the tree through the whole year – they are evergreen trees
- cones grow on these trees
